Interruptible energy is just that, no wind no generation

No, on the fountain wind project! A few years back, Texas learned a very harsh lesson! It was winter time and a cold front came through and froze up all wind generation! Being that the Texas electric grid is not interconnected to any outside states when the wind turbines went down, power was lost across the state. We need to learn from others mistakes and not repeat them! Not only that but the culture of our Native Americans that live in that area must also be respected!
NO ON THE FOUNTAIN WIND PROJECT!
