Docketed Date:	5/21/2024

Comment Received From: EnvironmentalSAVE LLC
Submitted On: 5/21/2024
Docket Number: 24-BPS-01

Comments for AB802

1. What are your plans for enforcing fines
2. Do not use BEAM, You can only join if you are the owner or the property administrator of the ESPM profile. If you have a 3rd party helping to submit, then we lose visibility on if the data is accepted.
3. How long does it take for TouchStone IQ to update their website once confirmed.
4. Is there a way to be more consistent across all of California or at a Federal level for reporting?
5. Can you help with the utility companies in California to come up with an easier way to auto sync into ESPM? In particular So Cal Gas is very difficult to sync.
6. How do you determine what existing buildings are on your list? Where do you determine that data? We have seen discrepancies on TouchStone for sq ft or even building type or even the address. We have emailed the benchmarkingca email to update, but is that the best way?
