## **Please support more H2 Stations**

Hello,

I purchased a Hydrogen car in 2019 with the hope that alternative fuels will provide a better environmental impact in our state. It's been several years now and the number of fueling stations have gone down. The prices have also gone up for refueling. I still believe in this wonderful technology as a clean alternative away from fossil fuels. Most people live in apartments and don't have access to install charging stations for battery electric cars. Also charging stations are never working properly and take several hours to charge. Please support Hydrogen stations as an ally to relieve the stress on the electric grid and charging infrastructure.
