## **NOT FAST ENOUGH**

I purchased my Toyota Mirai Hydrogen fueled car because I believed in doing the right thing for the environment. I commute 4 days a week, 42 miles RT. Over the 7 years of ownership, a big part of the time I was looking for stations that were opened. I needed to depend on getting to my job and felt I wasn't supported by the infrastructure of hydrogen stations. If you expect people to believe in hydrogen fueled cars you need to do a better job of adding more stations and lower prices. I have since sold my car because of those two issues and bought a car that relies on gas.
