Support for lower hydrogen prices

I am an owner of a Toyota Mirai and this past year we have seen fuel prices at the pump triple. This is unacceptable and disappointing knowing that there is no help for us. Many of us have \$20-30k loans and now the resale value of these vehicles have tanked to below \$10k. It's not fair to have to pay \$200 for a full tank, we simply cannot afford that. Two years ago the price of hydrogen was \$16 and now it's \$36, even at \$16 it was a little high for a full tank but manageable and worth it for a EV can could be filled up in less than 5mins. Please we ask for more support for hydrogen
