## **Comments in Support of Expanding Light Duty Hydrogen Refueling Stations**

Hello-

I wanted to send a quick comment for your consideration in funding and support for expanding Hydrogen Refueling Stations in California. I have owned a Toyota Mirai (Hydrogen Fuel Cell Vehicle) for just under 2 years. I bought it to see how the experience with refueling and driving would be. I am very happy with the drivability and less pleased with the fueling options. I also wanted to be an advocate for hydrogen fuel cells for the general public (my friends and people I speak with.) I will share that when people ask about it, the first response is always: "You mean the exhaust is water. How does that work? That's so cool. So where do you fill up with hydrogen? That's not so cool there aren't more stations." I know there are many requests for funding but your consideration for this effort would be greatly appreciated! Thank you.

Cheers,  
Paul Whitman
