Hydrogen fuel pricing

I have been using a Toyota Mirai FCEV about 1.5 years now. This is the only car we have. Currently hydrogen is being sold at 36 USD per Kg. This has severely impacted my commute and also the choices we make to travel. I hope that this issue will be resolved for general public sooner. Failing to do so, will severely limit the adoption of this technology. Not to mention that people who trusted the government and Toyota already feel betrayed.
