Re: Cleantech San Diego Support for RedoxBlox (Agenda Item 9b, June 12, 2024 Business Meeting)

MISSION:

To accelerate clean technology innovation and promote the equitable deployment of sustainable solutions across the San Diego region for the benefit of the economy, the environment, and all members of the community.

Chairman Hochschild and Commissioners:

On behalf of Cleantech San Diego, please accept this letter of support for the proposed resolution approving Agreement EPC-23-027 with RedoxBlox for a \$8,936,778 grant to install an advanced energy storage system on the UC San Diego medical campus.

Cleantech San Diego is a member-based business association that works to position the greater San Diego region as a global leader in the cleantech economy. In 2016, Cleantech San Diego was awarded a grant by the CEC to launch the Southern California Energy Innovation Network (SCEIN). The program provides free resources through a consortium of regional partner organizations to help energy entrepreneurs successfully bring their innovations to market. Cleantech San Diego has been working with RedoxBlox as a member of our SCEIN program since May 2023.

RedoxBlox's project will install and demonstrate a 3 MWh thermochemical energy storage system on the UC San Diego's medical campus that will provide more than 24 hours of electrical output and emergency support to the hospital and medical campus in loss-of-power events, including delivering high temperatures for industrial customers.

Cleantech San Diego is pleased to provide support for the proposed resolution approving Agreement EPC-23-027 with RedoxBlox. This project will not only support California's clean energy future but will further demonstrate California's leadership in this industry.

Thank you in advance for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Anderson", is written over a thin horizontal line.

Jason Anderson
