We are way behind our goals outlined by the Governor in 2013 for 100 stations and 200 station goal in 2025. Please do see us as drivers wanting to contribute positively to clean our environment. Hydrogen is very much a necessity for all of us and we can no longer single out Hydrogen. This will be the biggest blunder of the century if we do that. Listen to all of us Hydrogen car owners and companies looking to decrease their carbon footprint.
