SJC Proposed Lithium Battery Storage Facility

Whose brilliant idea is this? Have you done a population study? Do you have any idea how many people live within a 5 mile radius of this proposed site and would be greatly affected by a fire and the poisonous gases released as a result? Take a project like this out to the desert in an area where no human beings live, and where no lives would be in danger if an accident were to occur. I teach second grade, and even my eight-year-old students would be able to come up with a better alternative!
