mr

I am writing to ask the timing of the home improvement / upgrade rebates availability under the Inflation Reduction Act through the State of California. Since early 2023 I have heard that the program would be available in late 2023. That changed to 2024 and now it seems like it will never happen. I have been without HVAC since mid 2023 and would like to upgrade to a green system, but if the program does not happen within a short amount of time, I will be forced to go with a standard, inefficient gas system. Please advise.
