## **New Commercial Lithium Battery Storage System in San Juan Capistrano**

Any approvals for this must be denied in this location. Public safety concerns are VERY harmful. This location is adjacent to hundreds of homes and poses a large risk in potential fires and explosion hazards. This location is adjacent to Trabuco Creek, so extinguishing fires would affect an environmentally sensitive watercourse that flows to the ocean.

Approval of permits or entitlements would result in a threat to public safety and welfare. These types of lithium battery storage should never be located near homes or public watercourses!
