Opposition the proposed Battery Energy Storage Site in San Juan Capistrano

I am opposed to this BESS. Many residents in the immediate area are already dealing with insurance companies not renewing homeowners insurance policies because of potential fire risk in the area. Building a facility that has a known potential risk of fire will only make it even harder for homeowners to get insurance policies. If this gets approved, many will have to sell their homes because they will not be able to afford any high risk policies that may or may not be available.
