Expand and fund EV charging for all!

Transitioning to EVs removes the 4 MT of carbon dioxide emitted by the production and use of gas cars. Switching to EVs is the fastest ,easiest way least expensive way to reduce carbon emissions. Help expand charging to all. EVI am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers. As an EV driver, I enjoy the benefits of driving electric. I can save money on fuel and maintenance. And more EVs is the fastest , easiest way to fight climate change and see a real reduction in carbon emissions.
