Fund EV charging

Having EV charging available at apartments, townhomes, and other multi-family housing is essential for entry level drivers to purchase EVs. Being able to charge overnight while at home is critical to being able to make an EV or PHEV your daily vehicle. If you have to go elsewhere to charge (because it's not a quick 10-minute fill-up like gas) means hours of your day spent away from home charging. Or leaving your vehicle and walking back and forth, which is NOT SAFE anymore, especially for women.
