We Need More Charging Infrastructure Support

I would like to see funding continue. I have seen and personally experienced the benefits of increased, reliable charging infrastructure on EV adoption in my community and other communities in southern California. I've worked in the EV industry for 10 years, and we are on track to spur the necessary electrification adoption for our planet to survive. Please continue funding EV infrastructure projects so that communities that are historically disenfranchised can have equitable access to our EV future.
