Lithium storage facility dangerous

Hello Ladies & Gentlemen of the CEC

Please reconsider allowing a lithium battery storage facility near by the Saddleback church. This area is near to Forests and heavily popukated South Orange County. The potential for fires in our Canyons, an area that is nearly indefensible from fires.

This is a fragile habitat, so the impact would be horrific for our natural wilderness and for nearby communities.

My neighborhood and I strongly oppose any lithium storage facility here or anywhere in Orange County!

Sincerwly,

Deborah L Townes, RN, Retired Public Health Nurse
