## **The Golden State Needs to Show Leadership**

The Golden State is the inspiration for all the choices other states make. Our governor has made many leaps in the direction towards clean air and away from fossil fuel technology. We cannot abandon our important role in leading the nation towards better use of energy resources.

In 2015 I had an EV with a 100 mile radius and I was severely restricted from travel. Now the EV I own has a 250 mile range but I still am greatly challenged as a consumer to travel 80 miles to the Bay Area from Sacramento!  
EV owners need to be rewarded with the minimum courtesy of being able to charge without fear. Get it together!
