## **California needs EV chargers!**

I am urging the CEC to strongly support EV charging in every way! There's particular need by multi-family housing residents, renters, and rural drivers.

I'm currently shopping for an EV and committed to avoid burning fossil fuels as much as possible. It's critical for California's future (and the world's). We have good electricity in our state -- mostly from renewable sources -- so we need to change our fossil fuel usage to electricity as quickly as possible. Our state will be cleaner, healthier, and more energy secure the more we switch to electric vehicles.

Also, electric vehicles offer people lower fuel costs and hugely lower maintenance costs, which is important in this time of inflation.

Please do all you can to fund EV charging for Californians.
