## **Investment Plan EV Charging**

Please continue to fund EV charging stations. Making chargers more accessible and convenient will propel the transition from combustion vehicles to all-electric. This will decrease toxic and GHG emissions. Consider offering low interest rate loans to businesses and nonprofits who want to charge up their parking lots. Work with municipalities to build out park & drive lots to include Level 1 charging stations. Offer builders tax credits for all-electric buildings including charging structure.

Work with the legislature to raise revenue by increasing sales taxes and registration fees for combustion vehicles. Increase these sin taxes annually.
