## **H2 fueling station roll out**

The H2 filling station has been too slow! Committed consumers, whoâ€™ve leased or purchased H2 FCEVs have been waiting for both (A) H2 stations to increase and for (B) retail H2 price at the pump to decrease. Since Iâ€™ve had my Toyota Mirai (2021) exactly the opposite has happened on both trends. The effect is that H2 FCEV owners have been turning in their vehicles or writing them off. This in turn will lead to spiral-down: more existing H2 stations will close.

The consequences of A and B is that H2 consumer transport is being strangled in the State where it should be a beacon for the future. - Ted M
