Increase Funding for EV Infrastructure

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers. As an EV driver, I enjoy the benefits of driving electric. I can save money on fuel and maintenance. And more EVs means better air quality for our kids and communities and improved public health. Please help fund EV charging for Californians.

There is already too much subsidies for the oil companies. They are causing significant harm to the environment. Reducing oil subsidies and increasing subsidies for EV infrastructure is a huge improvement for the environment. Please increase, not decrease support for EBs and EV infrastructure!
