## **Protect EV charging funding for California**

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers. As an EV driver, I enjoy the benefits of driving electric because I have a home charger. I can save money on fuel and maintenance. And more EVs means better air quality for our kids and communities and improved public health. It is imperative that we should do everything we can in California to encourage drivers of all economic levels to have ready access to safe, reliable, and locally available chargers. Please help fund EV charging for ALL Californians.
