More Hydrogen stations

Please fund more hydrogen stations. We purchased hydrogen fuel cell cars because of the positive environmental factor, and now the stations are disappearing and leaving us with large paperweights shaped like cars. Please do the right thing and fund more infrastructure and fuel cell stations. The cost of hydrogen is also prohibitive in encouraging more people to move forward with this technology. Access and cost! If CA is going hassles, we need the support of our lawmakers to help this happen.

Fuel sell vehicles are one option that would allow people who live in high density housing to get away from gas vehicles as well. Electric and hybrid vehicles are difficult because they lack the ability to charge their cars with Hydrogen access they could Get out of gas cars as well without the fear of not being able to charge their car the only way to make this happen additional stations and better infrastructure.
