## **Please Consider Continued Support for EV Charging!**

I am the lead in my HOA's community charging project. MUDs, whether, condos such as ours, or apartments are underserved communities when it comes to EV charging. In our situations, about 50% of the residents have said their biggest barrier to EV adoption is the lack of charging in our parking area. I assume apartment dwellings face the same restrictions.

I urge the CEC to strongly support EV charging, especially for multifamily housing residents, renters, and rural drivers. As an EV driver, I enjoy the benefits of driving electric. I can save money on fuel and maintenance. But the primary reason we drive an EV is better air quality for our kids and communities and improved public health. Please help fund EV charging for Californians.
