Hydrogen Infrastructure

Hydrogen Toyota Mirai owner for 3 1/2 years, exceptional vehicle and want to continue to enjoy ownership of this vehicle. As an early adopter of FCEV technology we have seen the slow development of new fuel stations and would like to stress the need for additional funding towards these alternative clean air vehicles. With the available funding from Shell Energy Company leaving the money on the table, I hope these funds will be distributed to other projects of building out the Hydrogen network. Hydrogen vehicles are growing in sales and major manufacturers invested into this technology, from Toyota, Hyundai, Honda, Range Rover, BMW, and others currently in development, the need is there and California should be supporting this initiative 100%. Let's do right thing in supporting all owners who have invested into supporting clean air vehicles.
