Funding

Hello,

I am writing regarding the funding from the now-cancelled Shell agreement, considered for reallocation into heavy duty or battery electric infrastructure. Please let it go back into building light-duty hydrogen stations. Also please consider any funding for medium-duty hydrogen refueling infrastructure to include light-duty, since both are capable of sharing the same station equipment. The hydrogen prices have tripled since 2022 when I purchased my Toyota Mirai hydrogen fuel cell vehicle. We need more investment in the infrastructure for hydrogen fueling stations to reduce the costs and increase reliability and the number of stations.

Thank you!

Best regards,

Thomas Tan, PhD
