Clean Transportation Program

As an employee of a Green Energy company, it is important to have great incentives available to both end-consumers and businesses to purchase EV chargers for their home or business. Having a State funded incentive helps us navigate customers through the process of owning an EV charger which also commits the user(s) to commit to owning an Electric Vehicle. Please continue to fund the Clean Transportation Program as it's a useful tool for us to help electrify our great state of California!
