## **Proposed Sandpiper Energy Storage Project**

I'm a new resident of San Clemente--Just moved here from Tustin in May. I moved to San Clemente to live in a healthier area. However, I'm deeply concerned with the proposed Sandpiper Energy Storage Project to be built on 1400 East Avenida Pico. My main concerns are related to health, fire and insurance risks. We are already struggling in the state of California with obtaining homeowner insurance since the prior year fires, now we will be completely unable to get insured due to the added risk of potential fire hazards. In terms of health, I do not believe storage of toxic materials near a residential community makes sense... especially given that it is above ground with water runoff flowing towards homes.
