Fund EV charging

As an EV driver, I know EVs offer significant benefits to the driver, local economy, and environment, including cost savings on fuel and maintenance, and improved air quality and public health. Californians who live in multi-family housing, rent, or live in rural areas often lack access to low-cost charging options, which can make it challenging to drive an EV. Strong, continued funding for EV charging can ensure that all Californians can ride and drive electric and experience the benefits of EVs.
