A Network of 200kW+ DC Fast EV Chargers Please!

I strongly encourage the CEC to support and even subsidize the deployment of a planned network of 200kW or greater DC fast electric vehicle chargers. Such a network will allow vehicle manufacturers to use smaller batteries, keep charging times quick, and decrease fears of being stranded. Such a network of chargers could also increase the demand for the conversion of older cars to electric, where battery size is limited by the original GVWR of the vehicle.

Thank you.
