Support EV Charging-multi-family housing, apartments, rural areas

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, apartments complexes, and in sunburn and rural areas. As a privileged EV driver, I enjoy the benefits of driving electric because I live in my own home. I save money on fuel and maintenance and improve air quality. Charging stations is the key to making this climate friendly transportation accessible to low-income and underserved communities in San Diego and elsewhere. In these climate change impacted areas, there is NO EV charging options - with multi-family hosing, apartments, and semi-rural conditions dominate these communities. EVs means better air quality for our kids and communities and improved public health. Please help fund EV charging. for ALL Californians.
