Do not allow this project

I live right above this proposed monstrosity. This is a beautiful open area, adjacent to a popular hiking trail. I cannot believe Saddleback church would sell this land for this purpose. Pure greed, which, according to the bible, is a sin. Christians are supposed to be good stewards of the land. This facility is not needed. This technology is NET harmful to the environment, and will shortly be outdated.

I can't change homeowner's insurance because this area is deemed a wild fire zone, yet you would allow this facility with well documented fire issues to be built a stone's throw from my neighborhood?

Please support the will of the local residents for once and not cave in to the greed of those pushing this harmful project. Do not shove this unwanted project down the throats of the local residents.
