Please Continue to Fund EV Charging Support in California!

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers. As someone who is an aspiring EV owner, I would like to enjoy the benefits of driving electric. I can save money on fuel and maintenance. And more EVs means better air quality for our kids and communities and improved public health.

However, one of the biggest obstacles for myself and many Californians is access to EV charging, especially for the many Californians that live in multi-family housing. As you may know, California housing prices are so high that many young people like myself cannot afford single family homes. Due to that fact, many young folks who want to own EVs have limited access to charges when living in cheaper housing options such as apartments. Please help fund EV charging for Californians!
