## **Support Eis**

My wife and I have owned an EV since 2011, when we were among the first 100 people in the US to buy a Nissan LEAF. Since then, we have replaced that car with Chevy Bolt EV and then EUV. We have charging at home (powered by our solar panel system), but occasionally need to charge on trips away from home. Please do whatever you can to support the public's use of EVs by supporting EV charging throughout CA. Thank you!
