Charging Infrastructure Needs Investment

Electric vehicles bring many advantages, including many environmental benefits. One of the biggest hurdles to EV uptake and usage is the mediocre charging network. Effort and spending on the charging infrastructure at home, work, and everywhere is very important; please keep improving it!

On a recent business trip I rented an EV and had a great time driving it, but an awful experience trying to charge it. Until the EV infrastructure improves I will continue to use gas. This is a real shame.
