Support of Equitable EV Charging

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers who have barriers to charging. Providing equitable access to EV charging is critical to ensure all Californians have access to electric vehicles and the many benefits they provide: cleaner air, reduced green house gas emissions, maintenance and fuel savings, etc. In my role at the City of Berkeley, multifamily residents and renters reach out to me eager for charging solutions. They want to access clean, electric mobility options, especially EVs. Please help fund EV charging for Californians. It's good for public health and the climate, and will help cities and the state reach their climate goals.
