Please continue to fund EV charging infrastructure in California

I am urging the CEC to strongly support EV charging, especially for multi-family housing residents, renters, and rural drivers. As an EV driver, I enjoy the benefits of driving electric. EV drivers can save money on fuel and maintenance. And more EVs means better air quality for our kids and communities and improved public health. Please help fund EV charging for Californians.

The current lack of adequate EV charging infrastructure strongly discourages many drivers from making the switch to EVs. To meet California's climate goals and improve the state's air quality, the CEC needs to accelerate that switch by continuing to fund improvements to the state's EV charging infrastructure. Thank you.
