Please help fund EV charging for Californians

California Energy Commission:

I ask that the CEC support EV charging for rural drivers as well as for multi-family housing residents, and renters. I am an EV driver who strongly believes that electric transportation is the solution to numerous problems that we face as a nation and world. These include forced fealty to oil producing nations. EVs have far fewer moving parts and so are much cheaper to maintain. Electric miles are much cheaper than gas miles. More EVs means better air quality and improved public health. Please help more Californians to buy and use EVs by funding EV charging for Californians. Thank you.
