Hydrogen infrastructure

I purchased a hydrogen fuel car to help the environment, thinking this was the right thing to do. However the infrastructure makes this such a sacrifice that I'm afraid I will not be able to continue on this road without government help in building the infrastructure. I understand there is help building infrastructure for heavy duty and medium duty vehicles but nothing is being done for the light duty infrastructure. To support this without government is going to end in financial disaster for myself and many others. We tried to do right and in the end we are just hurting ourselves. Please help
Thank you
