Retirement and Disposal

What is the proposed useful life of this facility as designed? Given current lithium ion battery disposal guidelines given by the state and county, how will this equipment be disposed of? What is the process of deenergizing and safe disposal of the equipment? What are the transport requirements? permits? and license? Is the NTHSB aware of this proposal? The proposal as written simply removes the equipment but leaves the permanent features of this facility in place. How will public nuisances be managed? Things like graffiti and unauthorized access and use to name some.
