## **PLEASE SUPPORT EV CHARGING**

I am urging the California Energy Commission to fund Electric Vehicle charging in California. Especially for folks who live in apartments that can't easily charge at home like i can. As an EV driver of a Chevrolet Bolt EV I have thoroughly enjoyed the benefits of driving a battery electric car.

These include:

1. Never having to visit a gas station
2. No more oil changes
3. No more maintenance like replacing fuel filters, radiator flushes or transmission service
4. The convenience of being able to charge my Bolt at home
5. Peppy acceleration when i need it such as merging onto a freeway.
6. Regenerative braking which helps slow the vehicle, avoids excessive wear on brake linings and puts energy back into my battery... fore FREE!!
7. It's fun to drive!! Especially in the carpool lane when I'm driving solo (with my EV Decal of course)

Electric vehicles also help reduce carbon emissions thereby impacting climate change in a positive way.

I urge you support Electric Vehicle Charging Infrastructure for all Californians. It's money well spent.

Thank you for your consideration,

Orlando Terrazas
