## **Questionable stability of SJC battery farm**

I spoke to a retired geologist who surveyed the land at Rancho Capistrano at the request of Reverend Shuller. This was years ago and the land was considered unstable so he decided not to record the survey. The slopes to the west of the land have stability issues. An adjoining housing track is now a ghost town because of land slippage. The Oso creek is continuously eroding.

Please consider the safety of our community. Even on stable land, a battery farm does not belong in a residential area. Has the Army Corp of Engineers approved this site?
