saddleback church - san juan capistrano, ca battery storage system on church property

proposed usage of 13 acres of land for the battery storage system by Engie North America. The land is owned by Saddleback Church and was intended for a new facility to be added. The land, currently zoned as a planned community district TBD, did not initially align with the proposed battery energy storage system (BESS) under the zoning code. Assembly Bill 205 authorizes the California Energy Commission, or the CEC, to permit renewable energy projects, including energy storage systems, property is close to residential homes which will be negatively impacted. Church parking lot is not suitable to battery storage facility
