Compass Energy Storage Project - San Juan Capistrano

I oppose the construction of this project on the Saddleback Church property in San Juan Capistrano for a number of reasons.

1. These facilities have had fires which would endanger not only my home, which is directly above the planned facility, but several hundred other homes on the bluffs above the facility.
2. The facility is located near the San Juan Creek which drains to the ocean. It is a wildlife area and any chemicals used to extinguish a fire would be hazardous to the immediate environment and to the ocean.
3. Property values for all properties on the bluffs above the proposed facility would decrease sharply. We did not purchase our homes and maintain them to lose value.
4. Insurance carriers may drop policy holders due to the potential risks of fire and environmental hazards.

This proposed facility is dangerously close to homes, creeks, the ocean and historical treasures in San Juan Capistrano and should not be built. The land was donated to the church for use as a religious facility in support of the local community and should not be sold for profit, monetary gain, or the potential threat that it poses to the community.
