Opposition to fountain wind project

Connectgen has promised access out or into project area thru a few gates around area, one off Terry Mill Rd. This will not happen as legal access crosses private land; the timber company only has private access right thru said property for non-commercial use. Any commercial use, by Connectgen or timber company would require an agreement with the landowner, who to date has been one of the most active opponents to said project. Guessing that to change their mind would require more money than either company would pay, if the landowners would agree at all.
No access from west side of project.
