You need to implement this program now!

Iâ€™m a single 68 year old person who last year relied on a fire place to heat my home because my propane furnace died early 2022. I have friends in the same economic boat as I am. I do not have air conditioning and my 63 year old home is uninsulated. I am counting on the rebates of the inflation reduction act to help me afford a heat pump and maybe help with costs of insulation. Please take an action to make this law usable for the benefit of people in California.
