## **Please release the rebates from the Inflation Reduction Act!**

Iâ€™m 68 and have had to live two years using my fireplace for heat after my propane furnace died. I do not have air conditioning nor is my 63 year old home insulated. I need California to enact the rebates specified in the Federal Inflation Reduction Act so that I can afford to finally install a heat pump. Iâ€™m not the only senior depending upon California to finally put this Federal Act into use. Please tell me why my state has been sitting in its hand for over two years since this act was passed?
