Project Location

I am 150% against the proposed location for this project as it is insanely misplaced. You are planning to place this in a very poor location that abuts the 5 Freeway and very close to residential neighborhoods with fire hazards. We have all seen the recent battery storage fires in San Diego county recently and the technology is nowhere near where it needs to be to safeguard the residents, and possible interruptions a fire would cause to the I5.

Why would you ever think of putting tis project here versus a few miles East out into the desert are where any hazard would have minimal effect on the community.

Bad choice for location for a technology that is in need of further refinement putting our community at risk. Seems like money play from the Church you are risking our community in that game.

No bueno!! move it elsewhere where it is safer.
