Lithium batteries next to our neighborhood

Hi there, we live behind the hill where Sadelback Church on San Juan Capistrano is and heard they sold some of their land for a company to store lithium batteries. This poses a health and safety risk to our community. We are very concerned with what this will do to our insurance and most importantly our safety! Please do not allow this to be out by our homes. Fires are already a threat and this will only enhance it. Please do not do this!

Thank you
Audrey
